Professional Summary

Senior Backend Developer with **10+ years of experience** designing and delivering scalable, high-performance enterprise systems. Specialist in **Node.js** and **NestJS**, with a strong background in **Hexagonal Architecture** and event-driven patterns. Hands-on experience with **Azure** integrations. AWS certified with foundational knowledge of EC2, S3, IAM, and serverless services. Experienced in containerized environments using Docker and Kubernetes, and collaborating on CI/CD-driven pipelines. Proven track record in high-availability systems, advanced authentication strategies, and mentoring cross-functional teams on best practices.

Core Skills:

- **Backend & Architecture:**
Node.js, Express, NestJS, RESTful APIs, Python
- **Architecture:**
Microservices, Event-driven, Hexagonal Architecture, SOLID, TDD
- **Databases:**
MongoDB, MySQL, SQL, NoSQL, DB2
- **Cloud Platforms:**
Azure (enterprise integrations, Service Bus, cloud-based backend systems), AWS (Certified – Cloud Practitioner & Developer Associate)
- Hands-on experience building serverless applications using Lambda, API Gateway, S3, and Terraform (personal projects)
- **DevOps & Delivery:**
CI/CD pipeline collaboration (automated build & deployment workflows)
Familiar with Jenkins release processes
Docker & Kubernetes-based containerized environments
Git (GitHub)
- **Testing & Quality:**
Jest, Postman, cURL, Unit & Integration Testing
- **Performance & Debugging:**
Performance tuning, monitoring, profiling, troubleshooting in production environments
- **Architecture & Practices:**
SOLID principles, secure coding, event-driven design, TDD, Agile/Scrum

Projects

Serverless Document Processing Pipeline (Personal Project)

- Designed and implemented a serverless architecture using AWS Lambda, Amazon API Gateway, Amazon S3, and Amazon SQS, DynamoDB

- Built a file upload API using FastAPI to send documents to AWS services
- Automated infrastructure provisioning using Terraform
- Simulated AWS environment locally using LocalStack
- Implemented event-driven processing pipeline for asynchronous file handling

Education

- Postgraduate in IT Management and Governance, SENAC, 2011
- Bachelor's Degree in Systems Analysis and Development, UNIESP, 2007

Professional experience

October 2024 – Present | AB Inbev

Back End Developer (Contractor)

- **Architected and maintained** business-critical microservices using **NestJS** and **Hexagonal Architecture**, ensuring a decoupled and maintainable codebase.
- **Integrated complex SAP systems** via OData and REST APIs, streamlining data flow for essential business processes. Utilised Docker for containerization, improving deployment speed and reliability.
- **Optimized data persistence** by integrating NoSQL databases, focusing on scalable storage and query performance for high-load scenarios

December 2021 – April 2024 | IBM Internal Projects

Full Stack & Full Cycle Developer

- Led end-to-end development of enterprise web applications, managing Dev, Test, and Production environments on IBM Cloud (Serverless Architecture).
- Architected and implemented scalable frontend and backend applications using Node.js, TypeScript, React, and Angular 16, improving load times.
- Leveraged Chrome Dev Tools to identify performance bottlenecks and optimise frontend applications, improving load times and overall user experience.
- Drove adoption of CI/CD pipelines (Jenkins, GitHub Actions), reducing release cycle time.
- Enhanced application observability using Splunk for monitoring and Sonar for code quality metrics.
- Angular, Node.js, Express, TypeScript, RESTful APIs, Docker, CSS, GitHub, Cypress, Jira, Postman, MongoDB, VS Code.

July 2020 – December 2021 | Bradesco Bank (IBM Client)

Full Stack Developer

- Designed and delivered a mobile-friendly banking platform enabling account managers to send proposals, capture client approvals, and process transactions remotely, eliminating branch visits.
- Integrated backend APIs with secure authentication, ensuring compliance with banking regulations.
- Applied Postman and Insomnia for API testing and validation.
- React, Node.js, Express, TypeScript, RESTful APIs, GitHub, Cypress, Jira, Postman, Insomnia, MongoDB, VS Code.

January 2020 – July 2020 | Frontend Developer**BV Bank (IBM Client)**

- Led frontend development of a customer-facing banking portal using Angular+, enhancing usability and performance.
- Collaborated with backend engineers to integrate key customer data and financial product information in real-time.
- Angular, CSS, TypeScript, RESTful APIs, GitHub, Jira, Postman, VS Code.

November 2016 – November 2019 | Sprint Telecommunications (USA) (IBM Client)**Full Stack Developer**

- Developed and supported high-availability telecom applications in production environments.
- Automated workflows and improved UI/UX using Node.js, JavaScript, HTML, CSS, and SQL.
- Implemented multi-threaded backend services for faster processing and reduced downtime.
- Node.js, CSS, JavaScript, SQL, Postman, HTML.

January 2014 – January 2016 | Application Developer**IBM Internal Projects**

- Developed RESTful APIs integrating DB2 with NoSQL DBs for enterprise applications.
- Utilised IBM Cloud API services to streamline backend resource creation.
- Built JSON data pipelines for secure storage and retrieval.
- Node.js, Express, RESTful APIs, JavaScript, SQL, Postman.

January 2009 – January 2014 | Team Lead & Developer**IBM Internal Projects**

- Served as Geo Leader for a Japan-based client, overseeing requirements, development, and delivery.
- Directed a development team in building Angular/Node.js enterprise applications with NoSQL databases.
- Managed communication between business stakeholders and technical teams.
- Angular, Node.js, Express, JavaScript, TypeScript, CSS, Postman.
